**With its smooth ride and choice of elegant styling options, the Ateco Platform home lift brings luxury living to any building.**

Premium features come as standard across the Altura range, leaving you free to select the type and size of lift that gives the best solution for your needs. Ateco Platform is an open-sided platform enclosed within a metallic shaft, which can be installed in small spaces without compromising on comfort and ease of access.

The Ateco Platform has a clean and simple design, highlighted with elegant details, making it an attractive addition to any home. You can choose from a selection of customisable options to coordinate the lift with your interior.

DISCOVER THE  
LUXURY OF A  
HOME LIFT WITH  
ATECO PLATFORM

BB

My wife and I renovated an old house, and of course we wanted to make sure that we could stay in our dream home forever. Ateco Platform lift was the perfect final touch to give us that bit of extra comfort."

03

Ateco Platform and Gold Pro home lifts meet the highest standards of safety and comfort and comply with all relevant European safety standards.

1

### A SMOOTH RIDE

Ateco Platform is fitted with a soft start and stop device, giving you a smooth and comfortable ride every time you use your lift. Simply press and hold the destination button on the control panel, and let the lift carry you gently up and down through your home.

2

### DESIGN YOUR LIFT

With an array of options on offer, the Ateco Platform lift can truly become part of your home. Choose from a range of sizes, colours and details for the shaft, walls, floor and doors to create a lift that meets your needs and matches your surroundings.

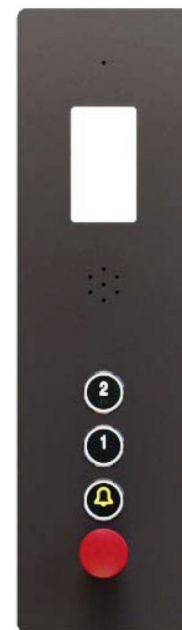

3

### EASY TO INSTALL

Ateco Platform is designed to fit into small spaces with minimal construction work. The lift is supplied with its own metallic shaft, the lift mechanism fully contained within the shaft. It runs on standard mains electricity and can normally be installed in just a few days.

Ateco Platform is fully compliant with all relevant European safety standards.

# FEATURES

06 COMFORT FOR ALL

1

## Control Panel

Ateco Platform control panel has been designed to look good while being clear and simple to use. The sleek black panel is illuminated with a soft white backlight. A high-quality colour display shows not only the floor level of the lift but also diagnostic codes, for easy service and maintenance.

2

## Small and Compact

The mechanism of the Ateco Platform is fully contained within the lift shaft; no additional machine room is needed. The shaft can be as compact as 900 x 940mm.

A small pit of just 50 mm is required. If a pit is not feasible, an access ramp can be supplied.

3

## Easy Maintenance

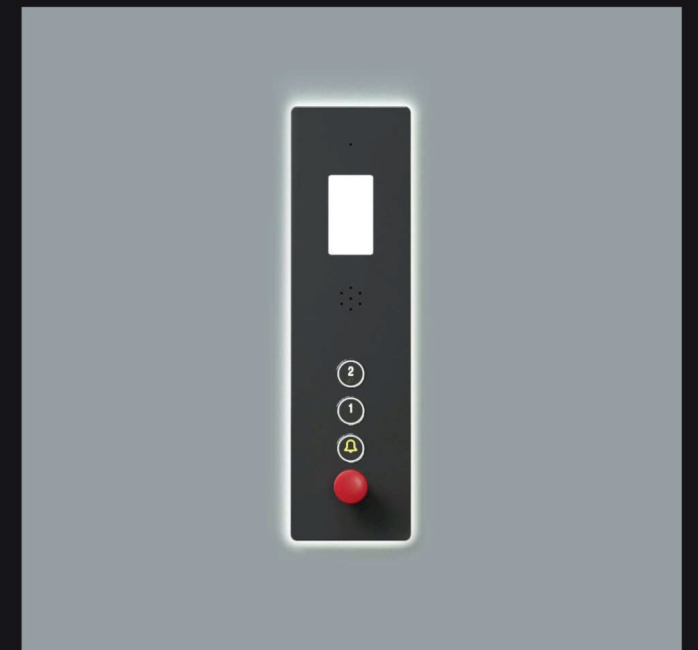

When you choose an Ateco Platform lift, you're choosing comfort, reliability and easy maintenance. An automatic lubrication system keeps the lift mechanism running smoothly and helps to keep your lift in top condition. The lift is designed so that servicing can be carried out quickly and conveniently.

4

## Keeping You and Your Family Safe

In the case of power failure, a battery back-up system will bring your lift safely down to a lower floor. A battery guard monitors the level of charge and ensures that there is always enough power in the battery to operate the back-up system.

A handrail, an alarm button, an emergency stop and two-way communication are all included as standard.

THE BACKLIT ATECO PLATFORM CONTROL PANEL LOOKS STUNNING, AND IS EASY TO USE

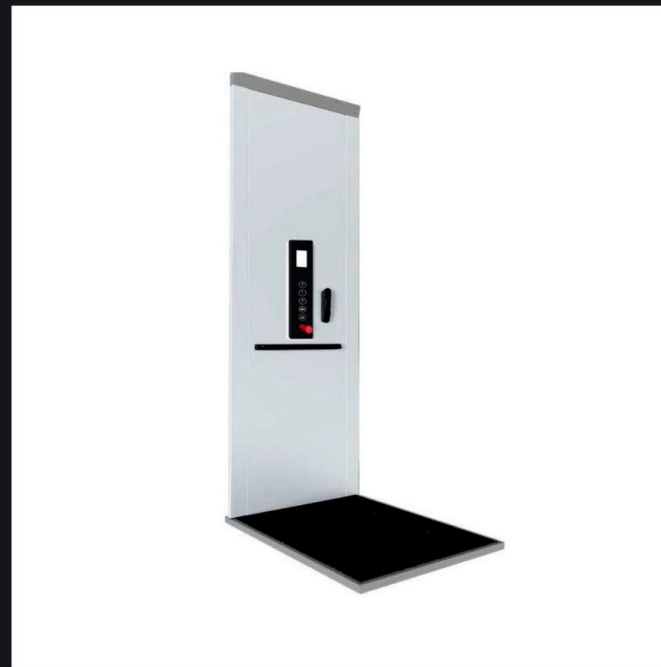

# OPTIONS

## DESIGN

## YOUR LIFT

Ateco Platform lift can be customised to match your home and your personality.

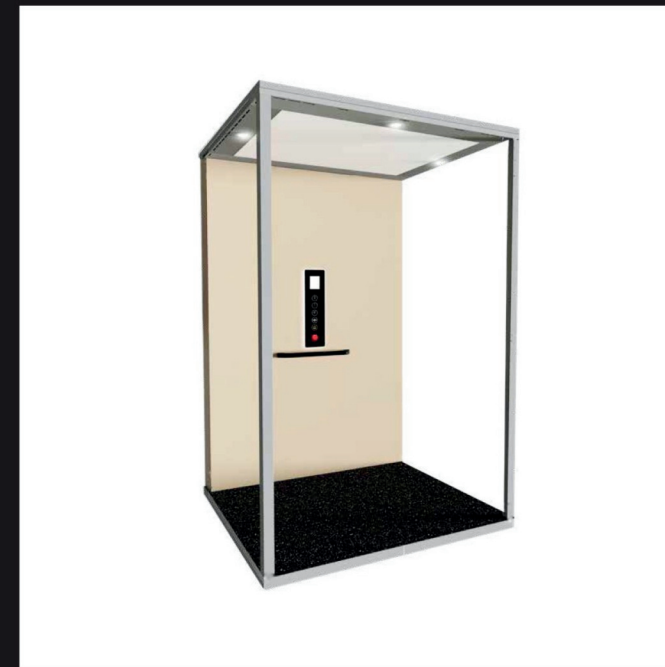

## PLATFORM TYPE

### Ateco Platform: Console Wall

The most compact version of Ateco Platform has a full height console wall, illuminated by an LED light strip across the top. Safety edges around the floor stop the lift in case of any obstruction.

This model is suitable for residential use only.

### Ateco Platform: Console Wall with Ceiling

This larger version of Ateco Platform consists of a full height console wall and ceiling with three LED spotlights. The open sides of the platform are fitted with photocells for safety.

Ateco Platform Pro is suitable for wheelchair users and conforms to all relevant accessibility standards.

A manual fold-down seat in transparent plexiglass is available as an option.

## LANDING DOORS

Ateco Platform can have one or two landing doors per floor, depending on the platform size. The doors are available with either a panoramic glass panel, or in plain steel and can be painted in a wide choice of colours. A smoke- and fire-proof door is available for the Pro model.

To protect your lift and property from unauthorised access, the landing doors can be fitted with different locking options, using either a standard key or a simple one-touch i-button.

Fully automatic door openers available as an option.
